LEVEL 2 · READY FOR MORE?

## Attack Battle

This is how the real game works, made simpler. Pokémon trade attacks until one runs out of HP.

1. Each player puts one Pokémon in their **battle spot**.
2. **Take turns.** Attach 1 Energy to your Pokémon — it stays attached.
3. **Attack!** Pick an attack and do that much damage. Skip extra words. No number? It does 10.
4. Subtract damage from the other Pokémon's HP. Use dice, coins, or paper.
5. HP hits 0? **Knocked out!** Bring out your next Pokémon.

**Bonuses:** +10 damage with matching Energy attached. Double damage if the defender shows the attacker's type next to *Weakness*.

**Winning:** Knock out 3 Pokémon (Quick) or all of the other player's Pokémon (Classic & Marathon).

LEVEL 3

## Ready for the real game

Learn attack costs, the Bench, Prize cards, and Evolution. An official two-player starter box or a local game store's beginner league is the perfect next step. Find tips and links at **playprep.app/battle**.
